

MY **VEHICLE** TECHNOLOGY

It's important that we know and understand what technology is built into our car. Go through this checklist so you can better understand your role behind the wheel while blended with the systems designed to assist you. If you do not know, go and check your driver's manual to be sure. If you have more than one car, check the others as well.

- 1). Do you have ABS (Anti-Lock Braking System)?
- 2). Do you have Traction Control?
- 3). Do you have an Accident Avoidance System?

ENHANCED DRIVING
